Geography

Living Books are the creators of the interactive storybook. Their titles are widely enjoyed by children for their compelling characters, colourful storylines and ease of use. Now fully localised into UK English and supported by Teacher's Guides, these entertaining products have become invaluable tools in guiding children through the early learning process.

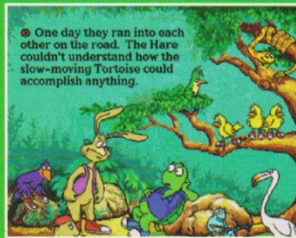

Just Grandma and Me ©

Little Critter and his Grandma go to the beach on the bus, where they explore the sea-shore and have a series of adventures.

The Tortoise and the Hare

From start to finish of the classic tale, this Living Book version includes dozens of hilarious new twists and lots of challenges for the inquiring young mind.

Sheila Rae the Brave

This new, interactive storybook uses music to help children learn to love reading.

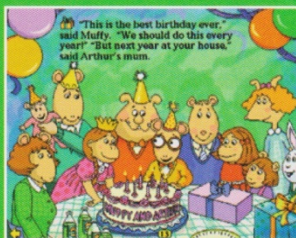

Little Monster at School

Even little monsters have to go to school! And while they really love break-time, it's fun to learn about new things too - like letters, numbers, science and even the importance of friendships.

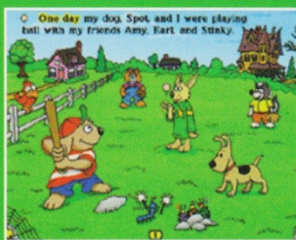

Arthur's Birthday

Oh dear - Arthur's party is the same day as Muffy's. But their friends don't know which party to go to - until Arthur has a brainwave which surprises everyone including himself.

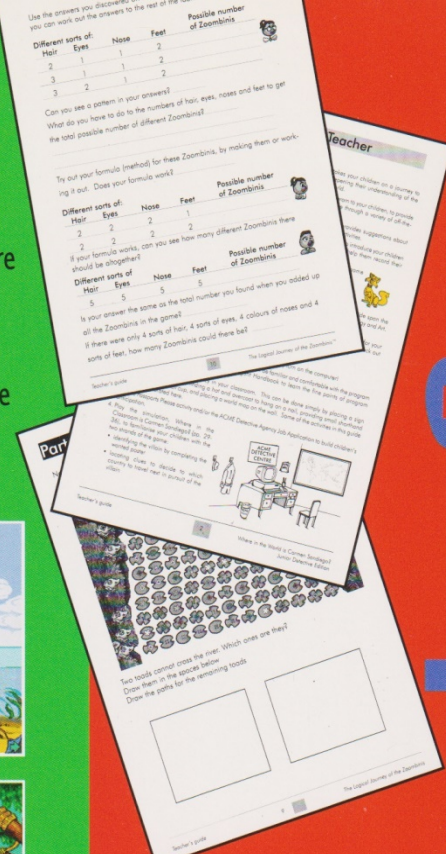

Harry and the Haunted House

Everything was just fine until Harry's ball managed to end up in the scary house next door. Are there really ghosts behind every door, or are Harry and his friends just imagining things?

English

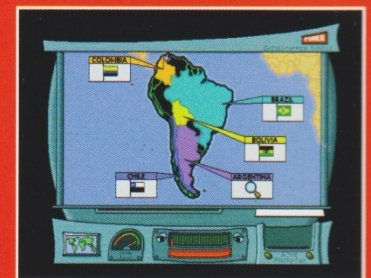

Geography

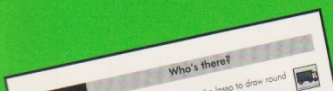

Where in the World is Carmen Sandiego?®

Children are involved in a round the world chase after a gang of crooks. A general awareness of world geography is instilled through the world map and statistical and descriptive information which is provided for 60 countries.

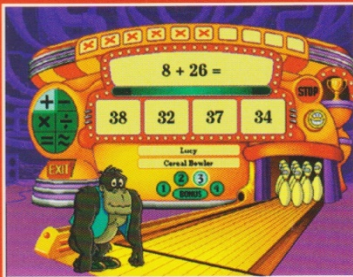

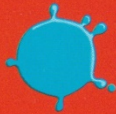

Carmen Sandiego Junior Detective Edition®

Suitable for younger children aged 5 and over, who can join in the chase for Carmen Sandiego in different continents around the world. Clues as to the whereabouts of the crooks are presented in a more pictorial format and the language is more suitable to a younger age group.

Creativity

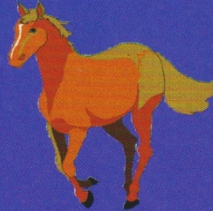

Maths Workshop™

Maths Workshop invites children to enter the exciting world of mathematics. Pupils are encouraged to solve equations and problems while learning about numbers, fractions, equivalence, and geometric figures.

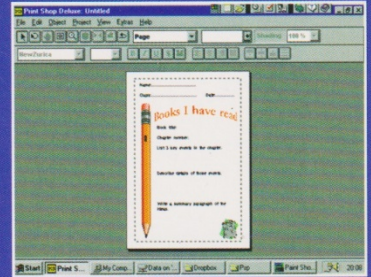

Click Art 40,000 Image Pak

Add fun, excitement and personality to all of your school communications with the ClickArt 40,000 Image Pak™ - a unique blend of images and fonts for use in school projects, activities, newsletters, signs, greeting cards, school brochures, presentations and much more!

Kid Pix® Studio

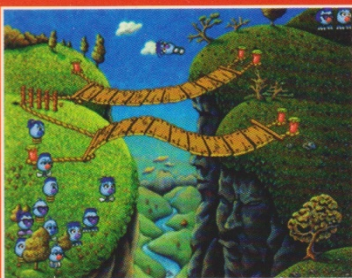

A unique multimedia tool which lets children combine animation, video, special effects and photos with their original Kid Pix drawings.

Print Shop™ Deluxe

Not just for pupils! Create greeting cards for classmates and parents, posters for the school play, signs for the classroom door, banners for the school fete, certificates for good work, calendars and much more using 4500 graphics, 70 fonts or add your own photographs for that personal touch. Print in colour or black and white.

Maths

The Logical Journey of the Zoombinis™

A fascinating and challenging game designed to help children explore and apply logic, problem solving and data analysis.

Broderbund®

Across the world, Brøderbund titles have consistently set the standard for educational software. With the increasing focus on supporting the use of software in the classroom, Brøderbund has anglicised a selection of their key titles and worked in collaboration with TAG Developments to produce School Editions. These include Teacher's Guides with invaluable technical tips and curriculum guidance, as well as project ideas and ready-made worksheets.

Brøderbund School Editions, co-produced by educators, have been designed for the 4-11 age group to enable teachers to realise the full potential of Brøderbund's dynamic software in the classroom.

These new, motivating classroom materials include curriculum-linked activities to add value to children's autonomous use of the programs.

The School Editions have been specifically developed to meet the needs of the UK curriculum with activities and suggestions suitable for the primary age range. Also included are ideas for whole class, group or individual activities. The materials encourage children to continue working on topics on or away from the computer, reinforcing classwork, extension work and homework.

Brøderbund School Editions are available with Teacher's Guides that include 2 CD's or Teacher's Guide only packs without the CD. CD's are also available for site licenses.
